Summary

Junior Go Backend Developer with hands-on experience developing backend services and REST/gRPC APIs. Experienced with Go, PostgreSQL, Redis, event-driven systems, Docker, Linux, authentication, and backend application design.

Experience

Go Backend Intern June 2026 – August 2026
NomadCodes *Astana, Kazakhstan*

- Developed and maintained backend services using Go, Gin, PostgreSQL, and GORM.
- Implemented REST APIs, database operations, validation, and transactional business logic.
- Improved role-based access control and authorization logic in existing backend services.
- Worked with Docker, Linux environments, and CI/CD workflows as part of the development process.

Go Backend Intern June 2026 – August 2026
Aira Group *Astana, Kazakhstan*

- Developed backend functionality in Go and integrated external services into existing applications.
- Investigated and resolved backend bugs to improve application stability and reliability.
- Performed end-to-end API testing and validated backend functionality across multiple scenarios.

Projects

Social Network Backend | *Go, gRPC, Redis, NATS, MongoDB* | GitHub

- Designed a microservices backend for authentication, user management, and notifications.
- Implemented gRPC communication between services and asynchronous event-driven workflows using NATS.
- Integrated Redis caching with cache invalidation for frequently accessed data.
- Implemented JWT-based authentication and user verification flows.

Shipping Service | *Go, PostgreSQL, REST, Logistics* | GitHub

- Developed a backend shipping service in Go for logistics and delivery management.
- Implemented REST APIs for managing shipments, delivery data, and shipping operations.
- Designed backend business logic and database operations for processing and tracking shipments.

Silent Room | *Go, PostgreSQL, Password Hashing (Salt)* | Live Demo

- Developed an anonymous confession notes platform built with Go and PostgreSQL.
- Implemented secure password hashing mechanisms with unique dynamic salts for content protection.
- Designed efficient database schemas and REST APIs for seamless creation and retrieval of anonymous messages.

Education

Astana IT University Astana, Kazakhstan
Bachelor of Software Engineering *2024 – 2027*

Technical Skills

Languages : Go, SQL, JavaScript, Java
Backend : Gin, REST, gRPC, JWT, GORM, pgx
Databases & Caching : PostgreSQL, MongoDB, Redis
Messaging : NATS, RabbitMQ
DevOps & Tools : Docker, Linux, Git, GitHub Actions, CI/CD
Observability : Prometheus, Grafana, OpenTelemetry
